

You're more fragile than you think!

Dear employee,

It's not breaking news that eggs break easily. But have you ever realized that we might be equally "breakable"?

This year's campaign draws the comparison and with a twist focuses on everyday risks at work. Wearing adequate personal protective equipment can make the difference!

One well known saying goes: you can't make an omelette without breaking eggs. But the edge of a pan can be a major issue for eggs destined for frying. Only one egg could avoid breaking its shell thanks to a safety harness.

You don't have to fall from very high up to suffer an injury or break, so always wear fall protection equipment when working at height.

So protect yourself and be aware of all the risks that surround you, wherever you are or go, at home or at work.

Kind regards,

The board

Rather not end up as a sunny side up?

Wear fall arrest protection!
